

FRACTIONAL SKIN RESURFACING

Your skin. Only better.

3DEEP Fractional Resurfacing is used worldwide for treatment of sun-damaged skin, reduction of hyperpigmentation, improvement of skin texture, decreasing the appearance of wrinkles and treatment of acne scars.

3DEEP FR, based on a unique radio frequency technology, represents the latest generation in skin resurfacing technologies. 3DEEP FR fractional technology offers a totally safe, energy-based system that combines depth controlled epidermal fractional ablation with simultaneous delivery of heat deep into the dermis. Sophisticated software personalizes the treatment parameters, assuring minimal discomfort, minimal downtime and maximal safety for your skin.

REAL PEOPLE. REAL RESULTS.

BEFORE TREATMENT

AFTER 6 TREATMENTS

AFTER 5 MONTHS

Texture & Scar Treatments

Full Face \$300
Face & Neck \$400

Spot treatments will be individually quoted.

Consultations are always complimentary.

Your skin. Only better.

EndyMed PRO SKIN TIGHTENING

Even with minimal sun exposure, our skin loses its firm, youthful look. Aging and cumulative exposure to the sun affects the quantity, strength and elasticity of the collagen fibers in our skin.

Skin laxity can be improved by employing non-invasive, energy-based technologies. Worldwide clinical experience has shown that when using the EndyMed 3DEEP RF technology, it is possible to promote the production of new, healthier collagen leading to a skin tightening effect with considerable reduction in the appearance of wrinkles.

RF (radio frequency) is an advanced technology that safely heats the collagen in the skin (dermis and subcutaneous tissues). If sufficient energy is delivered, the collagen will contract, providing an immediate change in skin appearance. The treatment also triggers a second process of new collagen production. A result of collagen remodeling is tighter, younger looking skin.
